**WallSHIELD**<sup>®</sup>

PROJECT DESCRIPTION  
Over 5000 sq. ft of WallShield was installed at the Aloft Hotel in Tempe, Arizona. WallShield is the most vapor and air permeable weather resistant membrane in the industry with a rating of 212 perms. WallShield allows trapped interior moisture to escape, reducing the risk of mold, mildew and rot.

The \$9.5 Million Aloft Hotel in Tempe, AZ was the first LEED certified hotel in Arizona and also for the Aloft brand. The hotel uses a heating/cooling system for only those rooms reserved, natural daylight in 75% of their public spaces, environmental cleaning products, optional housecleaning for their guests and only Arizona native plants allowing for water efficiency.

The Aloft brand, a division of Starwood Hotels & Resorts, delivers urban-influenced, vibrant design for travelers.

First LEED Certified Aloft Hotel in Tempe, AZ
